Communist Chinese Vaccines Infiltrate the United States

“The Chinese vaccine industry is developing rapidly due to an emerging and large market for current and new vaccines, a large potential for local vaccine manufacturing both in the public and private domain...”

“China ranks second among countries that export drugs and biologics to the United States.”

“Chinese companies now account for more than 50% of the global active pharmaceutical ingredient (API) market. It has more than 500 companies registered to sell in the U.S. and 10 times that many serving its own market. But many of those continue to struggle to meet international standards.”

Since the inception of the 1986 National Vaccine Injury Compensation Program, the pharmaceutical industry started to offshore the manufacturing of vaccines. It did so to meet the growing demand in producing hundreds of millions of doses each year for the United States vaccination schedule that had quadrupled in size and scope. First, the vaccine makers harvested active pharmaceutical ingredients from Asia (primarily Communist China); then outsourced research and development. Over the past decade, the world’s top five vaccine manufacturers built plants in Communist China.

“FDA quality control programs suffer gaps, from inventory and source material ingredients, to inability to inspect plants unannounced or has complete visibility over a Chinese plant’s total supply chain.”

“The Chinese Government should address the shattered public confidence made worse by the vaccine scandal. The health management system should be improved to ensure that vaccines are properly stored and transported, and transparency of supervision should also be enhanced.”

“Investigators in China have begun recalling defective vaccines produced by a Chinese drugmaker from domestic and overseas markets, health authorities said.”
